KAKO SENIOR SECONDARY SCHOOL

SAFE DRINKING WATER FOR LIFE.

On the 23rd of February 2022, KAKO senior secondary school and the surrounding community received through Tusaidiane Uganda a LineGuard Water purifier with various accessories

KAKO is happy to announce that they now hold access to clean water from a purifier that will thereby improve the livelihoods and health conditions of the school and surrounding community.

The school has almost 500 pupils who are going to benefit from safe drinking water. The students will receive water in 5-liter jerrycans provided by Tusaidiane to the school.

“Life will be easier for us the headmaster said, Previously the students and community members in the area had a problem of lack of clean and safe drinking water leading to diseases such as diarrhea, typhoid, cough and leading to high expenses for the school for boiling drinking water for the students.

The above picture is the Chairman of Tusaidiane Uganda handing over the water purifier to the Headmaster of KAKO senior secondary school.

We concluded the handing over by signing a service agreement of preventive maintenance twice a year, and training students on how to use the water.

Sensitization of the community

The school community was very inquisitive and receptive to the water project. Our technical team took some time to sensitize the community after installation.

Income generation.

Tusaidiane Uganda advised the school management as the host to charge a small fee for the safe drinking water which will cater for the maintenance of the purifier and any other school developments.

Students eagerly wait to fetch some drinking water and witness the launch of the safe drinking water.

Students making queues fetching drinking water.

KAKO Senior Secondary school management on behalf of its community thanked Tusaidiane Uganda for all its support and endeavors.
